

ADAPT IT AUSTRALASIA

Adapt IT Australasia Limited, a New Zealand registered company since 2009 and based in Wellington, is a subsidiary of the South African, JSE listed information technology company, Adapt IT (Pty) Limited,

We have a rich history spanning more than 29 years in offering comprehensive administrative software solutions for tertiary and vocational training institutions. Adapt IT Australasia has an in-depth understanding of the intricate and complex challenges faced by these institutions as they prepare students for their future role in society.

"Adapt IT Australasia is committed to bringing you solutions for today and tomorrow. We work closely with sector participants and tertiary education providers to enhance our products and identify opportunities for improvement."

Adapt IT joined forces with Student Management Software Solutions in March 2015 and with Meta Office at the beginning of 2016. The latter two companies amalgamated into Adapt IT Australasia on 1 July 2016. This places Adapt IT Australasia in an ideal position to offer tertiary sector providers products to meet the requirements of a diverse range of institutions, from the smallest Private Tertiary Establishment, Polytechnics and Wānanga to large Universities.

Adapt IT not only provides software to support the business processes of tertiary sector providers, but offers a range of related services to our clients, including implementation, system configuration, system integration, training, post-implementation support, custom development, technical support, cloud hosting, staff re-training, outsourcing services, etc.

Adapt IT's differentiated operating model is provided through an integrated and tailored solution and service offering:

About Adapt IT

Adapt IT, registered in South Africa and listed on the Johannesburg Stock Exchange, is an innovative information technology (IT) services and specialised solutions provider, delivering IT solutions to some of the most successful Education, Manufacturing, Financial Services and Energy organisations in over 38 countries worldwide.

Adapt IT has been involved in the education sector for more than 29 years and has in excess of 200 education sector clients world wide.

Adapt IT has formed strategic partnerships with the world's leading technology and business software providers, including Microsoft and Oracle in order to provide customers with robust, reliable and enduring solutions. The differentiated IT product and services offerings set Adapt IT apart in the marketplace and enable its customers to have uniquely tailored solutions powering the day-to-day efficiencies within their businesses.

Adapt IT is committed to fair and sustainable business practices and strict adherence to legislative requirements and other applicable regulatory frameworks in the countries in which it operates.

Our customers rely on us to solve complex problems which we do by designing, developing, implementing and maintaining a range of innovative software products and services.

Together with the broad range of technology based services offered by Adapt IT, we are able to unlock even higher levels of performance for our customers.

Our operating model

CUSTOMER BENEFITS

Statutory Requirements Supported

- functionality supports the statutory compliance and functional requirements unique to New Zealand tertiary institutions

Systems Tried and Tested – the solutions offered in the tertiary sector have all been in operation in Australasia for 10 or more years

Cloud options available – our systems can all be hosted in the Cloud, eliminating costly CAPEX expenditure and expensive in-house technical support

Experienced Local Staff – the systems are fully supported by experienced staff based in Wellington, with our helpdesk operational on all business days

Systems Enhanced through input from our client base

Our solutions

Adapt IT Australasia offers providers a number of student management related systems and will assist in identifying the best solution to support your business processes.

Our ITS Integrator ERP product suite, which is suitable for medium and large institutions, provides a rich set of functionality to enable back-office and front-office operations, as well as self-service functions for students and personnel alike. ITS Integrator is a functionally rich solution and supports core business processes, including:

- Student Management
- Finance Management
- Human Resources and Payroll
- Management Information and Business Intelligence
- Facilities Management

A best of breed implementation approach can be followed and clients only need to license those functional components that are required by the institution.

Artena is a web-enabled, MOE certified student management system that allows staff to track and manage the student lifecycle from the first point of enquiry, through admission and enrolment to graduation. It is easy to set up, configure, manage, and use. Artena meets all the regulatory and reporting requirements for New Zealand tertiary education providers. The system can be hosted either in-house by institutions or in the Cloud.

Take2 has an excellent track record as a reliable, “no fuss” student management system. The two versions of the Take2 student management system supports all student-related business processes. The system is ideal for polytechnics, Wānanga and PTE’s. Take2 is now the most widely used SMS amongst private tertiary providers. Take2 uses a standard computing environment to give a familiar “look and feel”, and provides for good integration with Microsoft Office applications. Take2 is also available as a web-based application hosted in the Cloud.

The Nipper system is ideal for the management of student records at smaller PTE’s. Nipper is kept up to date with the latest requirements from bodies such as TEC and NZQA. Nipper is easily installed on your own network, or can be hosted for you in the Cloud.

Our Hermes functionality ensures correct SDR submissions and compiles EPI statistics from your submitted SDR files. The overall EPI performance score of your institution can thus be measured against TEC’s performance thresholds.

Talk to Adapt IT Australasia about meeting the challenges of your environment.
